Energy Manager's Monthly Activities Report

MISSION: The Amesbury Energy, Environment, and Sustainability Committee serves the citizens, businesses, and city government through research, education, and recommendations regarding issues of energy, environment, and sustainability related to our city. These topics include, but are not limited to:

- The cost and availability of energy
- Safeguarding the health of residents
- Enhancing the resilience of public and private infrastructure to extreme weather events
- Minimizing the economic impacts of climate change
- Improving the overall living environment of Amesbury
